KHADIJAH ALASIRI

AI Engineer | Data Analyst | Digital Innovation

Asir, KSA | +966 55 200 3251 | Khadijahabdullah.2000@gmail.com | khadijah2000.github.io | linkedin.com/in/khadijah-abdullah-

SUMMARY

AI engineer and data analyst with a B.Sc. in Computer Science (Intelligent Systems) who starts from real-world problems and turns them into working AI and data solutions. Built a retrieval-augmented compliance assistant for Saudi data protection law, a computer-vision cultural tourism platform, and a recommender-based investment platform. Hands-on experience in government digital transformation, KPI dashboards, and ISO-aligned process improvement. Three national first-place awards.

EXPERIENCE

AI Engineering Program (AIEP), Graduation Project: SANAD (GitHub) 2026

Ministry of Communications and Information Technology, Saudi Arabia

- Built SANAD, a bilingual (Arabic/English) RAG compliance assistant for the Saudi Personal Data Protection Law (PDPL), with a 3-person team; Streamlit interface running on-premises via Ollama.
- Designed hybrid retrieval over 912 article-level chunks (multilingual E5 + FAISS, bge-reranker trust gate); improved Recall@5 from 0.455 (BM25) to 0.909 and Arabic-to-English retrieval from 0.156 to 0.938.
- Developed a deterministic citation verifier that eliminated fabricated citations (from 21.4% in raw drafts to 0%; 78/78 correct); achieved 93.3% correct abstention on out-of-scope questions and 93.4% answer accuracy in human evaluation (83 questions, 2 raters).
- Trained privacy-policy clause classifiers on OPP-115 (3,729 segments; TF-IDF + LR vs. Transformer, macro-F1 0.83) and built a gap analyzer mapping policies to 23 PDPL requirements, applied to the Tawakkalna app policy.
- Completed hands-on MLOps and deployment training: Docker, Kubernetes, MLflow, CI/CD, REST/gRPC APIs and microservices, model monitoring and data-drift detection, model quantization and pruning, cloud ML, Terraform, and agentic workflows (MCP).

Digital Transformation Trainee Jun 2024 – Sep 2024

Deanship of E-Services, King Khalid University (600 hours)

- Managed Qiyas (National Digital Transformation Index) standards and evidence across 3 university agencies; contributed to the university achieving 1st place nationally in the Innovation Phase.
- Built KPI dashboards to track procedure documentation, compliance status, and gaps per department, enabling data-driven follow-up.
- Supported the Deanship in obtaining ISO 9001 and ISO 20000 certifications; proposed a policy and procedure automation platform with evidence tracking and internal audit.

Healthcare IT Trainee 240 hours

IT Department, Aseer Central Hospital

PROJECTS

Nuzah: AI-Powered Cultural Tourism Platform 2022 – 2024

- Lead developer of a computer-vision platform that identifies cultural assets from the phone camera and presents bilingual information; 1st place at the Tourism Pioneers Bootcamp (Ministry of Tourism) and winning project at Museum Challenges.

Flight Tale: Virtual World of Wadi Ain Al-Dhiba Jan 2025 – Jun 2025

- Built a VR experience in Unreal Engine reviving Asir's natural heritage as a migratory-bird destination for the Virtual World Competition.

Bohor: Investment Platform with Recommender System (Graduation Project) 2023

- Mobile platform connecting student projects with investors, using content-based recommendations, chat, and online payment (Python, Dart/Flutter).

Smart Medication Reminder SDAIA & MoH Hackathon Finalist

- AI-personalized medication alerts with automatic escalation to family or hospital when patients do not respond.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Science, Intelligent Systems Track Jun 2023

King Khalid University, Saudi Arabia

ITIL 4 Foundation in IT Service Management PeopleCert, 2024

SKILLS

AI & ML: Generative AI, LLMs, RAG, Agentic Workflows, Model Context Protocol (MCP), Deep Learning, NLP, Computer Vision, Machine Learning, Predictive Analytics, Text Classification, Recommender Systems, Vector Search (FAISS), Reranking

Programming & Data: Python (Pandas, NumPy, scikit-learn, Transformers), SQL, Dart/Flutter, Streamlit, Ollama, Power BI, Excel

MLOps & Deployment: Docker, Kubernetes, MLflow, CI/CD, Terraform (IaC), REST/gRPC APIs, Microservices, Model Monitoring & Data Drift, Model Quantization & Pruning, Cloud ML (AWS SageMaker, Vertex AI, Azure ML)

Governance & Digital Transformation: Trustworthy AI, Bias Mitigation, PDPL, Qiyas, ITIL 4, ISO 9001/20000, BPMN, KPI Design

Immersive Tech: Unreal Engine, VR/AR, 360° Tours | **Languages:** Arabic, English
